CONCEPCION, January 27, 1954.-

Dr. Benjamin G. Horning
W.K.Kellog Foundation
BATTLE CREEK, Michigan

Dear Dr. Horning:

I did not tell Dr. Beddings to present his applications to the W.K.Kellog Foundation because I was expecting your visit in order to know what to do about it.

After receiving your letter I have called Dr. Beddings and I hope that his applications will be in Battle Creek very soon.

Dr. Hodgson is in England on a fellowship from the British Council and for this reason I think he will be not able to go to the United States this year.

I have other candidates for this or maybe next year.- Among them (and maybe the most important one for us) I have Dr. Edgardo Enríquez (Hugo Enríquez's brother) for Anatomy.- He is ready to go and his English is very good.- He is the second to the Profesor in Anatomy and is going to be Profesor himself in a few years.- Maybe you can select him for this year.- I have never before talked to you about Dr. Enríquez because he had other appointments but now he can go anytime to the States. You know that we have a very good anatomist as our Profesor but his teaching is too in the european way and Dr. Enríquez is the man who can change that.

- 2 -

Last year I presented to you Dr. José Carlos Quiroga, a man in Pediatrics.

Dr. Quiroga is one of the men we have in mind for the professorship in Pediatrics.- He is 38 years old and has ^{been} improving his English last year.- He is ready to go and I would appreciate it if you can do something for him this year.

See you here in March.

With best regards, I remain

sincerely yours
